"Customs clearance services to make it easier for customers both for export and import needs"

PROJECT CARGO HANDLING & TRANSPORT.

SSS provides a variety of ocean freight services to any destination in the world. We have technical and commercial expertise, and treat each project individually with a client-centric approach.

Experience :

LCT - JAKARTA - BALIKPAPAN

- Handling Import And Delivery
1 SET Gas Lift Compressor

LCT - TRUCK SUK

O O G **OUT OF GAUGE.**

FLAT RACK CONTAINER

OOG (OUT OF GAUGE) cargo refers to cargo that exceeds the size of a standard container. Flat rack containers or open top containers are used to transport such cargo safely. It requires an understanding of the cargo and how to handle it properly for safe transportation.

AIRCRAFT ON GROUND.

Aircraft on Ground (AOG) means that a plane cannot fly due to technical reasons. In the case of an AOG, onboard couriers are ready to bring the desperately needed spare parts as fast as possible to the grounded plane for repair, thus keeping costs and passenger inconvenience to a minimum. We manage the entire shipment process and deliver the spare parts in person to any destination worldwide, ensuring an efficient and secure process. For everyone involved — the airline, passengers, and shippers — this is a serious scenario. A grounded airplane creates delays in air traffic, flight cancellations, and unhappy customers. This can become very expensive, generating daily costs in the six- or seven-digit range.

Aircraft Engine

ATA CARNET TEMPORARY IMPORT / EXPORT

Temporary import using a Carnet can be done for specific intended purposes.

ATA CARNET is used for imported goods with the following purposes:
Concert Equipment, Exhibition, Fairs, Sports Events and other purposes.

1. For Professional or Specialized Equipment.
2. For Educational, Scientific or Cultural purposes.
3. For Sports Events.
4. For Exhibition and Fair purposes.

DOMESTIC LOGISTICS IN INDONESIA.

A shipping method in which one container is used entirely by one shipper or consignee.

This is different from Full Container Load (FCL): in LCL, one container is filled with goods from several shippers.

We are committed to supporting your business by providing a variety of exclusive services, because your success is our main goal.

Find reliable and efficient logistics solutions to strengthen your company's supply chain with SSS.

PERMIT.

- PI (Persetujuan Impor); Ministry of Trade
- LS (Laporan Surveyor); Pre-shipment Inspection at POL
- BPOM SKI ; Ministry of Food and Drug
- B3 ; Ministry of Environment and Forestry
- B2 ; Ministry of Environment and Forestry

The purpose of this permit is to regulate and supervise certain activities, ensure security, and protect the rights of the parties involved.

We can assist in handling all permits subject to limited restrictions.

WAREHOUSE MANAGEMENT.

Because one of the benefits is coordinating the distribution of goods, it helps avoid an imbalance in demand and supply.

Warehouse management includes six core processes. Each process influences the efficiency of the next, so every step must be optimized for the warehouse operation to run like a well-maintained machine :

OVERSEAS MOVING.

Moving house overseas

Whether you're moving a few boxes or your entire household overseas, moving and shipping companies can help you determine the best mode of transportation. There are three main options: by sea, air, or land. The method you choose usually depends on the destination.

DANGEROUS GOODS CARGO.

Dangerous Goods (DG) are substances or materials that are highly sensitive to air temperature, pressure, and vibration. They can pose risks to human and animal health, disrupt and endanger flight safety when transported by air, and may damage transport equipment.

Dangerous Goods (DG) can be transported by airplane and other modes of transport by complying with the requirements, rules, and procedures for handling DG in accordance with its type, class, and classification.

SSS accepts shipments of dangerous goods in full compliance with applicable regulations, including IATA Dangerous Goods Regulations, AVSEC National Regulations, and airline-specific policies.

SSS accepts shipments of dangerous goods by following and complying with applicable regulations, including IATA standards on Dangerous Goods Regulations, AVSEC National Regulations and policies set by each airline operator.

DANGEROUS GOODS HAZARD CLASSES

There are 9 Classification classes and divisions based on IATA (International Air Transport Association) Dangerous Goods or hazardous materials.

Class 1	Explosives  Explosives are materials or substances that are solid. Examples of flammable items are gunpowder, bullets, firecrackers and fireworks.	Class 5	Oxidation  Goods that enter class 5 are goods that are easily oxidized or cause damage when exposed to oxygen. Goods that easily oxidize are divided into two, namely oxidizing substances and organic peroxides. Class 5.1 : Oxidizing Substances Examples of oxidizing agents are Calcium Chlorate, Ammonium Nitrate, Hydrogen Peroxide, Potassium Perchlorate, Potassium Permanganate and Concentrated Nitric Acid. Class 5.2 : Organic Peroxides Materials or goods that spoil easily due to exothermic influences at normal temperatures. Volatile items, if inhaled by humans cause dizziness or drowsiness. Examples of organic peroxides are glass fiber repair kits, Calcium Chlorate, Ammonium Nitrate, Dicyetyl Perdicarbonate, and Methyl Ethyl Ketone Peroxide.
Class 2	Flammable Gas  (Gas Material) All gaseous materials including compressed ones. Prohibited gas materials can range from flammable or non-flammable gases to toxic gases. Class 2.1 : Flammable Gases Examples of flammable gases are Butane, Hydrogen and Propane. Class 2.2 : Non-Flammable Gas Examples of non-combustible gases are compressed oxygen, helium and nitrogen. Class 2.3 : Gas Poison Examples of toxic gases are carbon monoxide, aerosols of low toxicity, and tear gas.	Class 6	Toxic and Infectious Materials  This material can be a toxic substance (poisonous substance) and infectious substance (substance virus or bacteria). Class 6.1 Toxic Examples of toxic substances are methanol, benzene, arsenic trichloride and mercuric chloride, cyanide and pesticides. Class 6.2: Infectious Substances Examples of infectious substances are live viruses, live bacteria, the HIV virus, and vaccines.
Class 3	Flammable Liquid  Flammable liquids are liquids or mixtures containing solid solutions or saturated solutions which are flammable at temperatures below 35 degrees Celsius and must not be exposed to heat or under a pressure of 101.3 kPa. Examples of flammable liquids are Certain Paints, Alcoholic, Varnishes, Fuel Oil, Acetone.	Class 7	Radioactive Material  Examples of radioactive materials are Tritium, Uranium, Caesium 131, Iodine 132, and smoke detectors.
Class 4	Flammable Solid  Flammable solids are materials in the form of solid objects that are flammable when exposed to water, friction, or gas jets and can cause an explosion in a short time. Flammable solids are divided into 3, namely solid objects that are flammable, explosive, and become flammable gases when exposed to water. Class 4.1 Flammable Solid Examples of flammable solids are Matches (matches), coal, sulfur, and nitronaphthalene. Class 4.2 Explosive Solids Examples of flammable substances are White Phosphorus, Yellow Phosphorus and Magnesium Dinamide. Class 4.3 Solid objects become gases and are flammable when exposed to water Examples include Calcium carbide, sodium, Potassium Phosphide, Calcium Carbide.	Class 8	Corrosives Substances  Examples of corrosive substances are battery acid, bleach, sulfuric acid, hydrochloric acid, >2% sodium hydroxide, sulfuric acid and formic acid.
		Class 9	Miscellaneous Dangerous Goods  Other examples of dangerous goods are magnets, screwdrivers, knives, vehicles, electric wheelchairs, air bags and lithium batteries.

Delivery Mecanism

Mechanism or procedure for sending Dangerous Goods by air, following the following steps:

01

Contact the SSS call center to place an order or make a reservation for shipment schedules and destinations, including aircraft space availability and possible connecting flights.

02

Fulfill all document requirements according to the type and class of Dangerous Goods.

03

Meet packaging and labeling requirements according to IATA Dangerous Goods Regulations guidelines.

“ TO BE A LEADING AGENCY COMPANY WITH STRATEGIC INVESTMENT TO EXPAND OUR SERVICES TO THE ENTIRE REGIONS”.

PT. SURYA SURINDO NUSANTARA

Is a Shipping agency company in Indonesia Ports, was established in December 2021, located in Jakarta, Indonesia. We are here to serve the growing demand for trusted and reliable vessel agency.

Customer First

We understand that by supporting our customers to achieve their objectives, we will ensure our own success.

Commitment

As part of our commitment, we focus on providing the best service and solutions for every problem that may occur for our customers.

VISION & MISSION

01 VISION

To be the largest and most trusted shipping agency.

02 MISSION

Provide services that focus on each customer need. Provide solutions for every problem faced by customer.

SHIPPING AGENCY.

We aim and commit to introduce world - class integrated agency services to meet customer solution and satisfaction, as well as to respond the growing global trade market.

We have experienced as vessel agent for various cargo's in Indonesia Ports :

iron ore, coal, palm kernel expeller, palm kernel shell, wood pellet, granular urea in bulk, steel product, project cargo, anhydrous ammonia, etc.

Vessel Clearance

We maintain good relationships and coordinate with relevant parties to ensure that shipping clearance documents are prepared properly, so that vessel operations run smoothly and on schedule.

Port Information

We are committed to providing accurate port information and coordinating with relevant parties to ensure that shipping clearance documents are prepared on time, permits are issued promptly, and ship operations proceed smoothly and safely.

O P A **OWNER PROTECTIVE AGENT.**

We understand, sometimes every existing shipping has a contract/condition where it's obligatory to appoint an agent recommended by the charterer. Therefore to protect the ship owner we can act as OPA (Owners Protective Agent) which will provide updated conditions and also the best cost for this service.

As protective agents we ensure that your interests are well taken care of. This helps you avoid any conflict of interest that may arise with many stakeholders involved in a port call. Satisfaction of ship owners is our satisfaction as well.

STEVEDORING.

The business of stevedoring is a business activity engaged in the loading and discharging of goods to and from ships at the port.

Examples of common Break Bulk :
industrial machines or train carriages.

PROJECT CARGO HANDLING.

When you're still wondering how to move it, we've already got something in mind. From project forwarding, general cargo services, air freight and customs clearance to inland transportation, warehousing and consulting, our experienced specialists and strong partners all over the globe have everything it takes to make sure that when it comes to moving, nothing stands in your way.

Ocean Freight Services

SSN provides a variety of ocean freight services to any destination in the world. We have technical and commercial expertise, and treat each project individually with a client-centric approach.

Air Freight Services

SSN operates air freight consolidation hubs at strategic locations around the globe where items are expedited and sent out and our IATA-trained experts control documentation.
